<p>What will the student learn while on placement?</p>	<p>The T Level qualification is designed to give a unique blend of both classroom and workplace education that you will not find anywhere else. The content of the course is split into a core component, which is standard across all T-Levels, and an occupational specialism in adult nursing. The core component of the T Level Health will support the understanding of the health industry and covers a range of topics including: working within the health & science sector; principles of good scientific & clinical practice; providing person-centred care, supporting health & wellbeing; infection and prevention control; and core science concepts including the structure of cells, tissues and large molecules, genetics, microbiology and immunology. The occupational specialism in adult nursing will allow you to develop the relevant skills in preparation for your career in health. The adult nursing specialism will cover topics specific to supporting the adult nursing team.</p>
<p>Placement structure and learning goals (agreed learning objectives) including activities required and a list of “Do and Don’ts”</p>	<p>To be discussed with an employer and tailored to their setting / aligned to learning goals and spec.</p> <p>*Please see attached spreadsheet</p>
